Food for thought

Books are the most recognisable symbol of information, knowledge, and of enduring technology. As with food, information is part of our daily lives, what and how we choose to partake affects our wellbeing. The six books represent the six strands of the conference. Noodles and chopsticks are an essential part of the Hong Kong culture, as is technology and information.

Further information

Information on Hong Kong, sights, accommodation, registration fees, registration form, expression of interest, submission of papers, updated programme and tours can be found on the website.
